GAME DESCRIPTION

Magical and timeless riches await the lucky ones !

Diamond Hill takes you on winning paths across the enchanted kingdom and its ancient woodlands, packed full with magical ingredients that spark winning streak and guide players up the steep slopes of big wins to the summit where the eye-watering wealth resides.

GAME FEATURES

WILD MULTIPLIER

When Wild Symbols appear on the 1st or 5th reel after the reels stop, they randomly change to a multiplier ranging between x1 and x9. Every line win featuring a Wild symbol multiplies the line win by a particular multiplier that is displayed instead of a Wild symbol.

GAME FEATURES

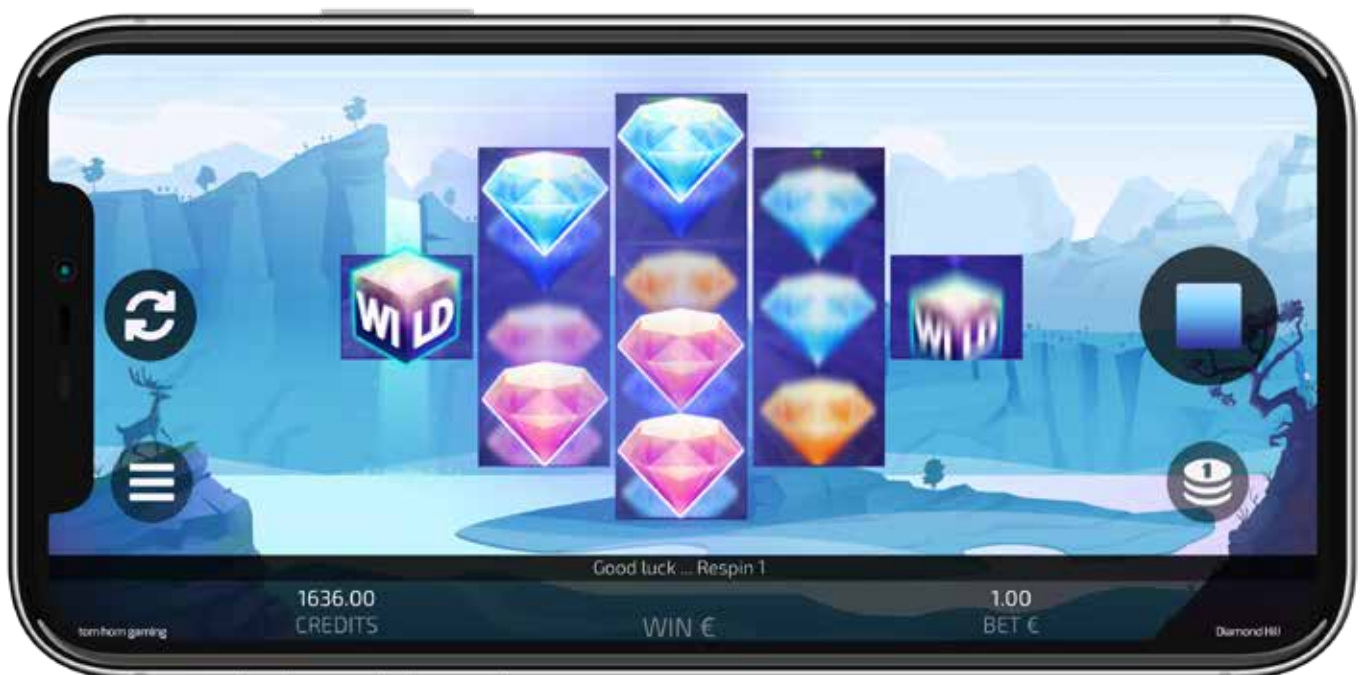

RESPIN FEATURE

A respin feature is triggered by any winning combination featuring a Wild symbol.

Once a winning combination appears on the reels, it pays the win and locks in place. The reels spin and all non-winning symbols are replaced with new ones.

The respin feature continues until a new winning combination occurs.

Then the feature ends.

GAME RULES

The video slot game, Diamond Hill, has five spinning reels with symbols on them. Every time you spin the reels, they come to rest showing a random selection of symbols, out of 9 symbols present in the game, in the game window. Certain combinations of symbols result in payouts.

You can choose the amount you want to bet on the 36 ways (lines, for short). For spinning the reels, you can use the Spin or the Autoplay buttons (on mobiles, Autoplay can be found in Options). When you use the Autoplay button, the reels spin automatically, using a fixed number of lines and bet you have chosen. The reels will stop spinning, when Free Spins or Bonus Games are triggered, or you can stop the Autoplay mode at any time by pressing the Stop button. When Autoplay is over and you win, a win is not automatically added to the balance. You have to click the "Collect" button.

Diamond Hill slot game is enhanced with special Wild symbols, which are randomly changed to multipliers from x1 to x9.

HOW TO PLAY:

To play the game:

1. Choose your Bet by clicking on the - and + buttons below the Bet box. After you have selected the maximum bet, by clicking on the + button again, you will reset the bet amount back to the minimum. This is a criss-cross game and the relevant bet is displayed below the Win box.
2. When you have made your bet selection, click on the Spin button to spin the reels. If the reels show a winning combination after they stop, you win according to the payout table.
3. When you click on the Bet Max button, you can play the maximum bet allowed in the game. After clicking on the Bet Max button, the maximum amount of bet is set up.
4. If you are not sure about your winnings, click the "i" (Payout) button in the game window to see the winning combinations. If you win on multiple lines, your winnings are added up and the total amount earned is displayed in the Win box.

GAME RECOVERY

In case you quit the game in process, in the moment when the Collect button is offered in the base game, all your winnings will be properly credited to your account according to the winning.
